ONLINE: AI in Education

Artificial Intelligence is transforming education—becoming more interactive and personalized. AI helps teachers with grading, assessment, individualizing, lecturing, proctoring, curriculum planning, and more.

Still a work in progress, AI can be utilized best by understanding its many features, benefits, and challenges. This course helps teachers learn about AI's transformational technology capabilities and explore possibilities to strengthen teaching—and learning—making it both more efficient and accessible. The Artificial Intelligence in Education course is a must-have for teachers everywhere..

Standards:

This course aligns to the INTASC Standards including Learner Development, Learning Environments, Content Knowledge, Application of Content, Assessment, Planning for Instruction and Instructional Strategies.

It also aligns to the McRel Teacher Evaluation Standards including Teacher Leadership, Teachers Know Content, Teachers Facilitate Learning and Teachers Analyze and Reflect.

Each online PD course includes:

- **Convenient access** anytime, anywhere, any device
- Interactive **online** textbook
- Implement **practical suggestions** immediately
- Demonstrate comprehension with **quizzes** and checks for understanding
- Print **certificates** of completion
- Easily assign courses to align with each teacher's **personalized PD needs**
- **Integrate** with school and district-wide initiatives
- **Low cost solution for all courses, all teachers, all school year**
- **Reports** for school administrators

Course Outline

LESSON

- AI Potential
- What is AI?
- Types of Artificial Intelligence
- Advantages and Limitations
- AI Capabilities
- AI Ethics
